# A Guide to Accessing Online Learning

During these unusual times, here at Murdishaw West we are still continuing to provide home learning activities for our children to complete online.
We will also be adding a wealth of ideas on our social media accounts and adding to our website page

www.mwcp.co.uk/home-hub

Each day our teachers are adding work to an app we use in school called Seesaw. If you are new to Seesaw or don't quite know how it works, please follow the instructions below. Our children use it in school regularly so once you have it up and running on a device, they should be able to complete their work independently.
Seesaw can be accessed through an APP or online (Chrome/Safari etc.)

Accessing Seesaw

1. For children to access Seesaw at home you will need to download the Seesaw **CLASS** app. More info can be found here about the app:

**https://web.seesaw.me/platforms**

2. The **FAMILY** app. This login has been emailed to you from Seesaw. This is where you will receive notifications when your child completes work. This can be done here:
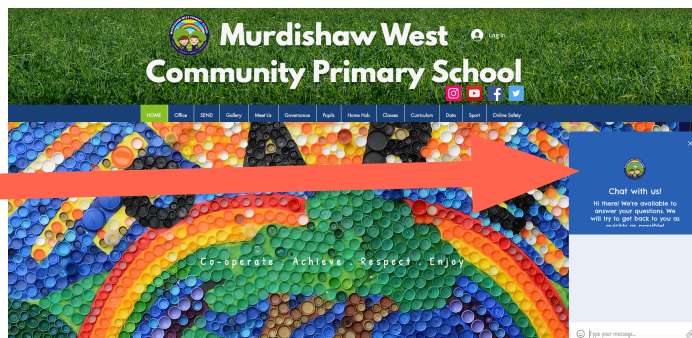

https://web.seesaw.me/platforms-parents

Seesaw Activities

To access assigned work:
1. Children will need to click on the Seesaw CLASS app and then select 'I am a student'

I'm a Teacher

🧑 I'm a Student 🧑
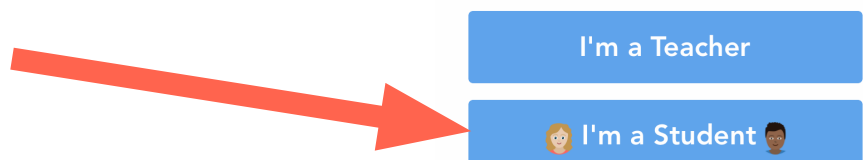

2. Login with your QR code or student code (if you haven't got this, please send a message on our 'Chat with Us!' feature on our website- www.mwcp.co.uk)

3. Once logged in, click on 'activities' then choose an assigned piece of work to complete.

Waiting for response
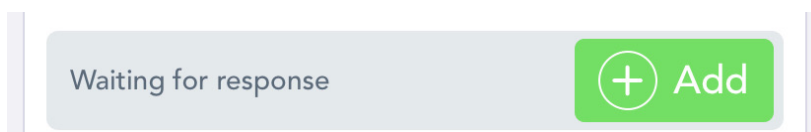

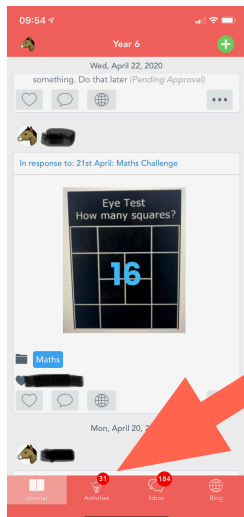

4. The activity will be waiting a response. To complete, select ADD.

5. To submit a piece of work, click on the green tick. To edit any work once it's submitted, find the activity and select the three dots underneath it.
